ABOUT ME

Since the first class I took from Harvard's CS50 course, I have fallen in love with programming. I love the challenging aspect of programming, the accomplishment when finally solving a coding issue, and seeing the programmes I wrote running on my computer. I love that I could improve my and other people's life by programming. In the experience section, you'll find the projects that I built to showcase my skills as well as my general background in developing software.

SKILL

HTML/CSS   **JavaScript**   **Python**   **Django**   **Flask**

EXPERIENCE

24 HR Vet Clinics in Taiwan (Website)

A bilingual site that allows user to access to the emergency vet clinics nearby. Using geolocation to find user's location and Google Map API to pin all the emergency vet clinics on the map.

24HR Vet Clinics API (Website)

This is an RESTful API that I built in order to update the information of my 24HR emergency vet website more efficiently. It provides several endpoints to get all vet clinics in English/Chinese, get vet clinics according to location (using city name as parameter), and update/delete/add a clinic in particular city.

Mapty - Workout Tracker (Website)

A workout tracker that allows users to add, edit, delete a workout (running or cycling), and delete all workouts. Utilized JavaScript to interact with localStorage API and leaflet API.

Bankist (Website)

A finance application that provides online banking and currency trading functionalities (exchange rate data provided by Exchange Rate API). Using HTML, CSS, JavaScript, Exchange Rate API, Python, and Django.

Lux - Your Personal Bar (Website)

Lux is a cocktail recipe site that allows user to search for cocktail, generate random cocktails, save cocktail as bookmark, and view the bookmarked cocktails. Utilized JavaScript to interact with localStorage API and theCocktailDB API.

To Do List App (Website)

Allow user to create, view, update and delete tasks after account creation. Equipped with user authentication and password reset features. Built with Django's FBV.

EDUCATION

Chung Shan Medical University   Bachelor of Biomedical Sciences   GPA: 3.0
